

A Crystal Achievement Award Company

Sunrise Windows has the distinction of winning the 2003 Crystal Achievement Award for Most Innovative Window. This much sought-after honor is a benchmark of the industry's top innovators in products, manufacturing & marketing.

► CRYSTAL ACHIEVEMENT AWARDS

SunBlinds offer a distinct new feature to homeowners replacing their windows.

Most Innovative Window

SunBlinds Windows

Sunrise Windows, Temperance, MI

Sunrise offers its casement, bay, bow and picture windows with optional SunBlinds, mini between-the-glass blinds that provide homeowners with the privacy, convenience and control of traditional blinds, and without the frustration of dusting or risk of damage by children or pets.

Available in two options, lift-and-tilt SunBlinds use a two-way magnetic mechanism to raise, lower or tilt the blinds to any position desired by simply pulling a cord. Tilt-only SunBlinds can be tilted to any position by sliding the lever at the top of the window to either side. Sealed between the panes of glass and operated by low-profile mechanisms, both SunBlinds styles are out of the way of most other window treatments, giving homeowners flexibility to decorate however they choose. Featuring a slim design that allows consumers to opt for low-emissivity coatings on the glass, the slats are also painted with a low-emissivity paint that helps reflect back heat, further increasing energy efficiency.

The lift-and-tilt slats are available in white, off-white, almond, gray, gold, and silver, and the tilt-only slats are available in white and alabaster. Sunrise offers a full array of other options on its windows as well.
